

# EICHER / TMTL GENSET

At MARSZ Electricals Pvt. Ltd, power generation for our country is all we do. As India is taking giant strides in industrial & economic development, we want to assist this with our cutting edge product development, our network of experienced in house customer support & service team. MARSZ believes in single focus & commitment to provide reliable power solutions, which is unmatched in this industry.

MARSZ diesel generators provide power solutions to every requirement of industrial generators. Our industrial generators are available in a range of sizes to meet any application. MARSZ industrial generators have a high dependability and reliable mechanical and electrical performance. Our industrial generators are developed to ensure a continuous supply of power in the event of failure of the grid systems. If you are looking for an industrial generator for uninterrupted power supply, then MARSZ Industrial generators are the right choice.

## WHY MARSZ:

No matter what you need back up power for, whether to keep a factory producing or a hospital operating or a SSI running its business, our MARSZ Industrial Generators will serve you with back-up power which you will find reliable, consistent & customised.

## SILENT GENSET 5-125 KVA

The 5 kVA to 45 kVA models are Air cooled range sold under Eicher engine brand. The 50 KVA to 125 KVA models are Water cooled range sold under the TMTL engine brand. In the Eicher range, 30 KVA genset onwards are turbo charged with leading to superior fuel efficiency. All engines have A1 governing except the 125 kVA genset, which has the upgraded ISO-chronous governing.

These engines have the highest moment of inertia owing to the heavy flywheel ensuring the best quality of power and zero flickering. The latest example of our engineering excellence is our flagship 125 kVA genset which is a technological marvel. Our 125 KVA genset range, TMTL is the only genset company which has developed in-house CRDI technology. Other features include, Protection for Over / Under Voltage / Frequency / Speed, Over Load, Canopy Fan fault, Load Imbalance, Low Lube oil pressure, High cylinder / Water Temperature, Low Fuel Level, will display the service due alert based on running hours. All these features translate into high savings for owners and it promises precise power with zero fluctuations in voltage and frequency even at Jerk loads.

## TMTL ADVANTAGE

- Diverse range: Pick from 5kVA to 125kVA diesel powered generators.
- A silent acoustic canopy which keeps the noise level in check as per CPCB II regulation.
- Performance-oriented industrial generators.
- Engines from the reputed brand: We take care to use only EICHER / TMTL brand of engines to help the industries remain powered up for long.
- Innovative Products
- Experienced dealer network
- Extended warranty\*
- Sturdy gensets – longest life in the industry
- Zero flicker gensets – enhancing equipment life
- High fuel economy and longest service period in the industry – high savings for the customer
- Round the clock service backup – 99.9% up time
